HEALTHCARE

F&P Airvo 3 Optiflow High Flow System.

A humidifier with integrated flow generator, delivering respiratory support and airway hydration with a focus on mobility and continuity across the patient journey.

Standardised consumables.

Compatible with existing Airvo 2 patient consumables, facilitating integration into an existing Airvo 2 fleet.

Extended compatibility to smaller Optiflow Junior 2 nasal interfaces

Simple touch screen display.

Quick selection and adjustment of therapy settings.

Visualise patient trends and graphs.

Single Optiflow mode.

One mode to enable Optiflow high flow applications across adults and pediatric patients.

Flow range extended from 2 to 70 L/min to treat a wider group of patients.*

Flexible oxygen inputs.

High-pressure oxygen input enables precise FiO_2 adjustment directly on the device, automatically adjusting oxygen input to meet target FiO_2 .

Alternative low-pressure oxygen input also available.

Integrated battery.

Enables 40+ minutes of operating time to facilitate transport and patient mobilisation throughout the hospital environment.
